

CLARK TRACKS

high performance for maximum work life

TRACKS

GROUZER

DEMANDING TERRAIN

Climate

Terrain

Machine

Link

The Grouzer is a popular track with outstanding traction and climbing ability. This track is able to cope with almost any terrain and machine.

TERRA85

MULTI-TERRAIN

Climate

Terrain

Machine

Link

Terra85 is the ultimate all-terrain, all-season track. Featuring a double grouzer track plate, grip and flotation are assured. The low profile also means less vibration and a smoother ride.

CX

CLIMBING XTREME

Climate

Terrain

Machine

Link

CX is a further Grouzer development, featuring wide paddle spikes, doubled up on each track plate. This track is best suited to Harvesters and medium to heavy Forwarders. They give peak performance for climbing with unsurpassed traction.

FXS

SUPER DUTY TRACTION

Climate

Terrain

Machine

Link

FXS features extended Terra95 track plates with wide paddle spikes, doubled up on each plate pad to ensure aggressive grip on the most demanding terrain.

GSG

ULTIMATE CLIMBING

Climate

Terrain

Machine

Link

Grouzer Super Grip (GSG) is the single wheel track that delivers maximum climbing capability for 6-wheeled machines. GSG's give exceptional traction and require less maintenance than tyre chains.

ATF

ALL-TERRAIN FLOTATION

Climate

Terrain

Machine

Link

Designed for use in wet marshy conditions and also snow and ice. A special link system is utilised to enable better cleaning and ejection of snow and mud. Wide and upturned edges give flotation whilst a pinched mid-section generates traction.
