

5660-QU

The Quadco 5660 Harvesting Head is a whole lot of power packed into a durable, high efficiency machine. With a standard 0.404" top saw and a 12-tooth swing out saw disc for a high-speed, 24" quality cut, this harvesting head is built to maximize productivity. Its controlled fixed mount adapter allows the head to float during processing mode, while the high-performance disc saw combines speed and reliability to lower your operating costs. Plus, this model has seen over 25 improvement updates in recent years, ensuring that you're getting the latest technology to maximize your uptime.
